

SurgiTable 200

Mechanical–Hydraulic Operating table

**Manual
positioning of
flexibility**

SurgiTable 200 is a type of manually controlled operating table for universal surgical-positioning use. With hydraulic drive and pneumatic assisted positioning system, the system can be set up easily and smoothly during surgeries.

The special four-stand base gives excellent stability during operation. Meanwhile, with front-ended brake and release control, SurgiTable 200 also can be easily moved and locked whenever work site needs to be changed.

Besides comprehensive accessories for application in Gynecology, Urology, Minimal Invasive Surgery, Hand & Arm, Kidney, ENT surgeries, the detachable head and leg sections further allow for combination of external head fixation and leg traction device during ophthalmologic and orthopedic surgeries.

Up to 200kg load ability makes SurgiTable 200 applicable for patients range from child to adult.

Product overview

Integrated kidney elevator. 0 to 120mm height adjustment.

Driven TILT, TREND & reverse-TREND, and autres positions

Four stand base of great mobility with front-ended release and brake control.

Coussinets de table remplaçables, antibactériens et sans latex.

Patient load up to 200kg during positioning movement.

Detachable leg section for orthopaedic extension.
