ROOM DOPAIR

ROOM DOPAIR est un dispositif mobile de purification et décontamination de l'air des zones à risque.

Immédiatement opérationnel et totalement silencieux, ROOM DOPAIR peut atteindre des performances demandées pour les zones ISO6 (25 changement d'air minimum par heure), ISO7 (15 changement d'air minimum par heure) et ISO 8 (NF ISO 14644-1).

Aucune modification ou altération n'est nécessaire pour sa mise en œuvre.

FUNCTIONS

ROOM DOPAIR réduit:

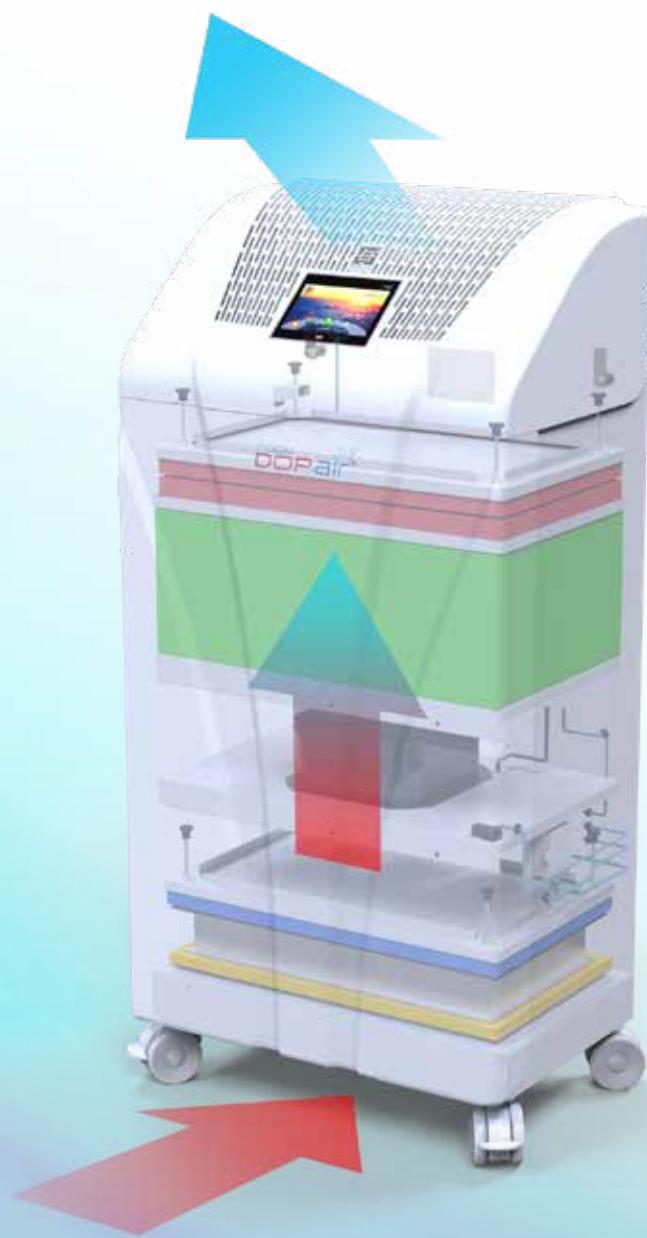

- ▶ Le risque d'infections d'origine microbiologique et exerce une action bactéricide, fongicide, sporicide et virucide sur les particules vivantes tels que l'*Aspergillus Niger*.
- ▶ La pollution moléculaire (COV, formaldéhydes,...)

DEVELOPMENT

Fruit d'un travail en partenariat avec nos clients, ROOM DOPAIR a été élaboré en prenant en compte les remarques du personnel de l'hôpital et des autres zones protégées (archives...).

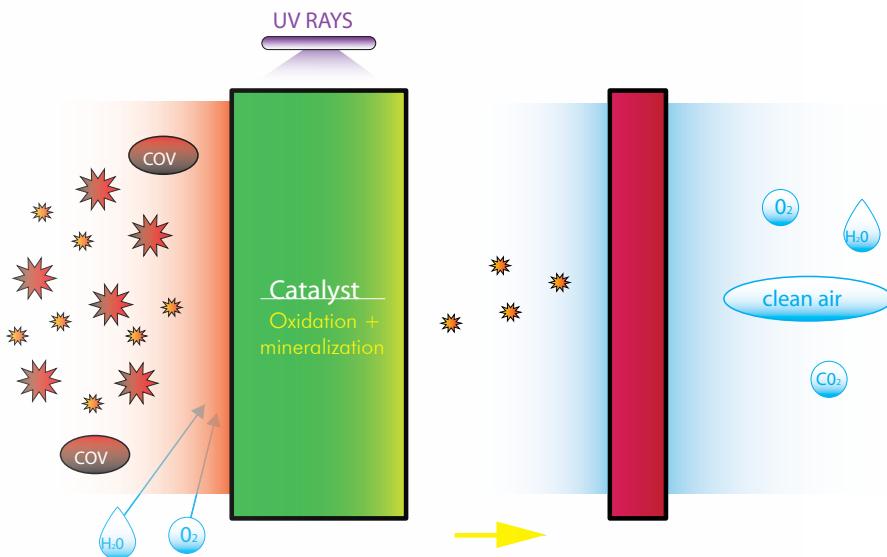

Le résultat final est une unité compacte, mobile et silencieuse qui offre une solution immédiate pour atteindre les classes bactériologiques et particulières requises, et une forte réduction de la pollution moléculaire.
